

SI Instruments—test equipment for Closure Torque Testing

Preform Holder Accessory

SI Instruments have developed a Preform Holder, used with a Mecmesin Orbis Torque Tester, to allow measuring of the closure torque of screw caps. The bottle slips easily into the holder, where the cap is instantly in the centre of the Torque Tester, ready for measurement.

The Preform Holder can be easily removed so the Mecmesin Orbis Torque Tester can be used for standard bottles.

RELATED PRODUCTS

Mecmesin Vortex

Motorised or computerized closure torque testing....

Force gauge

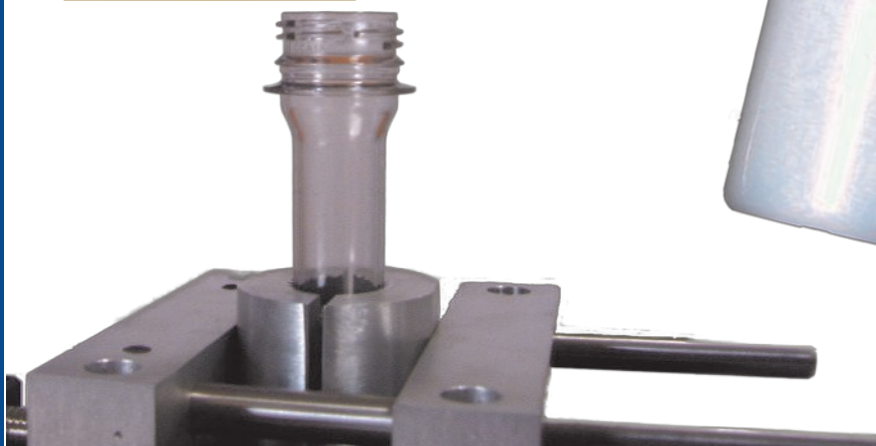

Accurate & repeatable force measurement including Bluetooth technology....

Digital Hardness Test

Measure hardness of rubber or plastics with a Shore Digital Durometer....

Key Features:

- Easy to Use
- Can be removed
- Auto centre of sample
