with RS232
output

The CFG+ digital force gauge with RS232 output provides an economical solution for simple tension and compression testing. Powered by AAA batteries, the CFG+ can be used handheld or fixed to a manual or motorised test stand.

A simple digital alternative to traditional analogue spring balances, the CFG+ is ideal for users with a limited budget, who only measure on an occasional basis for non-critical applications.

The CFG+ is available in 3 models - 50N, 200N and 500N (11lbf, 44lbf and 110lbf) - and comes complete with a set of accessories, so you can start testing immediately.
